INTERNATIONAL PRELIMINARY EXAMINATION REPORT

I. Basis of the report	
1. This report has been drawn up on the basis of:	
the international application as originally filed.	
	and the second of the second o
[x] the description, pages 1-40	, as originally filed,
pages	
	, filed with the letter of,
pages	, filed with the letter of,
[x] the claims, No	
No	
No.	
	, filed with the letter of,
[x] the drawings, sheets/fig 1/18-18/18	, as originally filed,
sheets/fig	, filed with the demand,
	, filed with the letter of
sheets/fig	, filed with the letter of
2. The amendments have resulted in the cancellation of: pages:	41-48 (claims 1-14)
sheets of drawings/figures No.:	•
3. [] This report has been established as if (some of) the a	mendments had not been made, since they have been
considered to go beyond the disclosure as filed:	
4. Additional observations, if necessary:	
In the file of the IPEA the orig	
not available. Accordingly, it c	
published application fully corr	esponds to the documents
originally filed.	
In consequence, the Internationa	l Preliminary Examination has
	the International Applica-

INTERNATIONAL PRELIMINARY EXAMINATION REPORT

tion published under the PCT (WO 93/22342).

STATEMENT		
Novelty (N)	Stains 1 (partially), 2-10, 11-13 (partially)	YES
	Claims 1 (partially), 11-13 (partially)	NO
Inventive Step (IS)	Claims 1 (partially), 2-9, 10-13 (partially)	YES
	Claims 10 (partially)	NO
Industrial Applicability (IA)	Claims 1-13	YES
	Claims	NO

2. CITATIONS AND EXPLANATIONS

- 1. The particular protein L variant of the present application as identified by the sequences of claims 1 and 2 is novel and comprises an inventive step (Art.33(2) and (3) PCT).
- 1.1 EP-A2-0 255 479 (D1) discloses the existence of a particular protein L variant derived from P.magnus 312, however, without indicating its primary structure.
- 1.2 It becomes evident by comparing the particular sequence fragment of Infection and Immunity 58/5, 1990, 1217-1222 (D2), Fig.5, with its corresponding part of the sequence of claim 1 that the present application discloses a protein L variant which is different to that of D2.
- 1.3 Said finding is considered surprising as the cited prior art does not allow to assume or conclude the existence of a further protein L variant of <u>P.magnus</u> in an obvious manner.

Moreover, the variants of D2 and the present application have been isolated from the same strain, i.e. <u>P.magnus</u> 312, which fact allows to conclude that the present application seems to disclose a further <u>allelic</u> protein L variant. In the absence of any hint or evidence to the existence of a further (allelic) protein L variant of <u>P.magnus</u> 312, said finding allows to acknowledge an inventive step.

- 1.4 The same applies to the "subfragments and multiples or mixtures of the B1-B5 domains having the same binding properties" of claim 1, to the particular hybrid proteins of claims 3-7 comprising one or more of the B1-B5 domains according to claim 1, and to the plasmids and hosts of claims 8 and 9, too.
- 1.5 In addition, the subject matter of claims 10-13, as far as referring to the novel and inventive subject matter as identified above, meets the requirements of Art.33(2) and (3) PCT, too.
- 2. However, claims 1 and 11-13 also comprise subject matter which does not seem to be novel (Art.33(2) PCT).
- 2.1 The <u>"variants</u> having the same binding properties" of claim 1 - without precisely defining said variants fall under the scope of D1, page 2 and claims 1 and 2, and of D2, abstract, materials and methods, "purification of protein L" and Fig.1, thus contravening Art.33(2) PCT.

Indeed, both the proteins L of D1 and D2 and that of the present application share the same source, have identical molecular weights and the same binding properties. Hence, D1 and D2 undoubtedly represent particular protein L variants. Accordingly, the "variants" of claim 1 include the particular variants of D1 or D2, as well.

- 2.2 In consequence, claims 11-13, referring to said protein L variants, as well, and their use in kits and pharmaceutical compositions, comprise known subject matter (see inter alia D1, claims 10 and 11).
- 3. The subject matter of claim 10, as far as referred back to the "variants" objected to under Art.33(2) PCT (see above, item 2.1) lacks an inventive step (Art.33(3) PCT).

The skilled person is aware of the appropriate technical teaching which allows to clone and express the full length cDNA encoding the protein L variant of D2 with reasonable expectation of success.

The priority documents pertaining to the present application were not available at the time of establishing this written opinion. Hence, it is based on the assumption that all claims enjoy priority rights from the filing date of the priority document. If it later turns out that this is not correct, the document

J.Biol.Chem.267/18, 1992, 12820-12815, cited in the international search report could become relevant to assess whether claims satisfy the criteria set forth in Article 33(1) PCT.

Claims

1. Protein L having the ability to bind to the light chains of immunoglobulins, characterized in that the protein L has the following amino acid sequence:

- 7. DNA-sequence, characterized in that it codes for a protein according to Claims 3, 4 and 5.
- 8. A plasmid vector, characterized in that it includes a DNA-sequence according to any one of Claims 2 and 6-8, preferably the vector pHDLG or pHDL according to Fig. 3 or 4.
- 9. A host cell, c h a r a c t e r i z e d in that it is transformed with the hybrid plasmid according to Claim 9, in particular a host which belongs to the species <u>E. coli</u>, particularly <u>E. coli</u> LE392, or <u>Bacillus subtilis</u>, <u>Saccaromyces cerevisiae</u>, preferably Id. Ref. DSSM <u>E. coli</u> LE392 pHDL and <u>E. coli</u> LE392/pHDLG respectively.
 - 10. A method for producing a protein according to Claims 1 and 3-5, c h a r a c t e r i z e d by cultivating a host cell according to Claim 10 under suitable conditions; accumulating the protein in the culture or lysing the cells and extracting the protein therefrom.
 - 11. A reagent kit for binding, separating and identifying immunoglobulins, characterized in that it includes a protein according to any one of Claims 1 and 3-5.

20

- 12. A composition, c h a r a c t e r i z e d in that it includes a protein according to any one of Claims 1 and 3-5, and optionally additives or carriers.
 - 13. A pharmaceutical composition, c h a r a c t e r i z e d in that it includes a protein according to any one of Claims 1 and 3-5, and optionally a pharmaceutically acceptable carrier or extender.

RECEIPT IN THE CASE OF AN ORIGINAL DEPOSIT issued pursuant to Rule 7.1 by the INTERNATIONAL DEPOSITARY AUTHORITY identified at the bottom of this page

I. IDENTIFICATION OF THE MICROORGANISM	
Identification reference given by the DEPOSITOR	Accession number given by the INTERNATIONAL DEPOSITARY AUTHORITY:
LE392/pHDL	DSM 7054
II. SCIENTIFIC DESCRIPTION AND/OR TAXONOMIC DESIGNATION	TION
The microorganism identified under I. above was accompanied by: () a scientific description (X) a proposed taxonomic designation	
(Mark with a cross where applicable)	
III. RECEIPT AND ACCEPTANCE	
This International Depositary Authority accepts this microorganism is on 1992-04-28 (Date of original deposit)	dentified under I. above, which was received by it
IV. RECEIPT OF REQUEST FOR CONVERSION	• • •
The microorganism identified under I above was received by this Inter (date of original deposit) and a request to convert the original deposit received by it on (date of receipt of request for	to a deposit under the budapest fleaty was
V. INTERNATIONAL DEPOSITARY AUTHORITY	
Name: DSM-DEUTSCHE SAMMLUNG VON MIKROORGANISMEN UND ZELLKULTUREN GmbH	Signature(s) of person(s) having the power to represent the International Depositary Authority or of authorized official(s):
Adress: Mascheroder Weg 1 B D-3300 Braunschweig	O. Weiks Date: 1992-05-04

Where Rule 6.4(d) applies, such date is the date on which the status of international depositary authority was acquired.

HighTech Receptor AB Malmö Börshus S-211 20 Malmö

VIABILITY STATEMENT
issued pursuant to Rule 10.2 by the
INTERNATIONAL DEPOSITARY AUTHORITY
identified at the bottom of this page

I. DEPOSITOR		II. IDENTIFICATION OF THE MICROORGANISM
Malmö	Pech Receptor AB Börshus 20 Malmö	Accession number given by the INTERNATIONAL DEPOSITARY AUTHORITY: DSM 7054 Date of the deposit or of the transfer 1: 1992-04-28

MIKROOF Address: Mascherod	TSCHE SAMMLUNG VON GANISMEN UND ZELLKULTUREN GmbH er Weg 1 B aunschweig	Signature(s) of person(s) having the power to represent the International Depositary Authority or of authorized official(s):

¹ Indicate the date of original deposit or, where a new deposit or a transfer has been made, the most recent relevant date (date of the new deposit or date of the transfer).

² In the cases referred to in Rule 10.2(a) (ii) and (iii), refer to the most recent viability test.

 $^{^{3}}$ Mark with a cross the applicable box.

⁴ Fill in if the information has been requested and if the results of the test were negative.

HighTech Receptor AB Malmö Börshus S-211 20 Malmö

RECEIPT IN THE CASE OF AN ORIGINAL DEPOSIT issued pursuant to Rule 7.1 by the INTERNATIONAL DEPOSITARY AUTHORITY identified at the bottom of this page

IDENTIFICATION OF THE MICROORGANISM	
dentification reference given by the DEPOSITOR	Accession number given by the INTERNATIONAL DEPOSITARY AUTHORITY:
LE392/pHDLG	DSM 7055
I. SCIENTIFIC DESCRIPTION AND/OR TAXONOMIC DESIGNAT	ION
The microorganism identified under I. above was accompanied by: () a scientific description (X) a proposed taxonomic designation	
(Mark with a cross where applicable)	
III. RECEIPT AND ACCEPTANCE	·
This International Depositary Authority accepts this microorganism id on 1992-04-28 (Date of original deposit) ¹	entified under I. above, which was received by it
IV. RECEIPT OF REQUEST FOR CONVERSION	
The microorganism identified under I above was received by this Inter (date of original deposit) and a request to convert the original deposit received by it on (date of receipt of request for	
V. INTERNATIONAL DEPOSITARY AUTHORITY	
Name: DSM-DEUTSCHE SAMMLUNG VON MIKROORGANISMEN UND ZELLKULTUREN GmbH	Signature(s) of person(s) having the power to represent the International Depositary Authority or of authorized official(s):
Adress: Mascheroder Weg 1 B D-3300 Braunschweig	Date: 1992-05-04
	La control outhority was acquired.

Form DSM-BP/4 (sole page) 0291

Where Rule 6.4(d) applies, such date is the date on which the status of international depositary authority was acquired.

HighTech Receptor AB Malmö Börshus S-211 20 Malmö

VIABILITY STATEMENT
issued pursuant to Rule 10.2 by the
INTERNATIONAL DEPOSITARY AUTHORITY
identified at the bottom of this page

I. DEPOSITOR	II. IDENTIFICATION OF THE MICROORGANISM
Name: HighTech Receptor AB Malmö Börshus Address: S-211 20 Malmö	Accession number given by the INTERNATIONAL DEPOSITARY AUTHORITY: DSM 7055 Date of the deposit or of the transfer 1: 1992-04-28
III. VIABILITY STATEMENT	
The viability of the microorganism identified under II above was On that date, the said microorganism was (X) ³ viable () ³ no longer viable IV. CONDITIONS UNDER WHICH THE VIABILITY TEST HA	
IV. INTERNATIONAL DEPOSITARY AUTHORITY	
Name: DSM DEUTSCHE SAMMLUNG VON MIKROORGANISMEN UND ZELLKULTUREN Gm Address: Mascheroder Weg 1 B D-3300 Braunschweig	Signature(s) of person(s) having the power to represent the International Depositary Authority or of authorized official(s): One of Date: 1992-05-04

¹ Indicate the date of original deposit or, where a new deposit or a transfer has been made, the most recent relevant date (date of the new deposit or date of the transfer).

² In the cases referred to in Rule 10.2(a) (ii) and (iii), refer to the most recent viability test.

 $^{^{3}}$ Mark with a cross the applicable box.

⁴ Fill in if the information has been requested and if the results of the test were negative.

INTERN 'TIONAL SEARCH REPORT

International application No. PCT/SE 93/00375

A. CLASSIFICATION OF SUBJECT MATTER

IPC5: C07K 13/00, C12N 15/31, C12N 15/62, A61K 37/02, C07K 3/18 According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHED

Minimum documentation searched (classification system followed by classification symbols)

IPC5: C07K, C12N, A61K

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

SE,DK,FI,NO classes as above

Electronic data base consulted during the international search (name of data base and, where practicable, search terms used)

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category*	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.
X	EP, A2, 0255497 (HIGHTECH RECEPTOR AB), 3 February 1988 (03.02.88)	1-2,8-14
		,
Y	WO, A1, 8705631 (PHARMACIA AB), 24 Sept 1987 (24.09.87), see especially claim 9	3-14

	 -	·

X	Further documents are listed in the continuation of Box (X	See patent family annex.

- Special categories of cited documents:
- "A" document defining the general state of the art which is not considered to be of particular retevance
- "E" ertier document but published on or after the international filing date
- "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- *P" document published prior to the international filing date but later than the priority date claimed
- T* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- "X" document of particular retevance: the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken atome
- "Y" document of particular relevance: the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art
- "&" document member of the same patent family
